S. P. JAIN,
for Registrar General, India.

NATIONAL SAVINGS CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

* In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

† Figures not available.

Explanation of symbols used :—B.—Births ; B.R.—Birth rate ; C.—Cholera ; S.—Smallpox ; P.—Plague ; F.—Fever ; D.D.—Dysentery and Diarrhoea ; R.D.—Respiratory diseases ; M.D.—Maternal deaths ; D.R.—Death rate ; I.D.—Infantile deaths (included in total deaths).

REMARKS

The figures of births and deaths shown in this statement for week ending the 23rd December, 1950, relate to 160 towns with an estimated population of 19,188 thousands. The total number of towns is 233 and their population is 28,421 thousands. Thus 69% of the total number of towns representing 68% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 14,975 and 7,630 representing birth and death rates of 40·6 and 20·7 per thousand of population respectively.

(A) States (Parts A & C).—The data here relate to 144 towns with an estimated population of 17,149 thousands. Information about Assam, Bihar, Madhya Pradesh, and West Bengal could not be included. The total number of towns is 201 and their population is 24,668 thousands. Thus 72% of the total number of towns representing 70% of the total population is covered. The numbers of births and deaths recorded in those towns were 13,747 and 7,052 representing birth and death rates of 41·7 and 21·4 per thousand of population respectively. The table at the end gives the position by states.

The towns of Melapalyam, Palyaamkottai, Tuticorin and Vizianagram in Madras and Cuttack and Puri in Orissa

recorded high death rates of 79·6, 70·4, 56·6, 98·6, 60·1, and 83·9 per thousand of population respectively. In Vizianagram, Melapalyam and Palyaamkottai, the high death rates were mainly due to deaths from cholera. In the last two, respiratory diseases also accounted for a considerable numbers of death. In Tuticorin, the high death rate was mainly due to deaths from respiratory diseases. In Cuttack, the high death rate was mainly due to deaths from smallpox and in Puri to dysentery and diarrhoea.

(B) States (Part B).—The data here relate to 16 towns with an estimated population of 2,039 thousands. The total number of towns is 32 and their population is 3,753 thousands. Thus 50% of the total number of towns representing 51% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,228 and 578 representing birth and death rates of 31·3 and 14·7 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
